

Year 3

Mrs Halstead and Mrs Stonier

Welcome to Year 3

Maths We are working hard to learn our times tables so that we can recall them quickly, especially out of order and know the associated division facts. We are focussing on addition and subtraction, both mental and written methods, including money. Shape, data, measures, fractions and of course time will also be taught.

English As a class we are striving to write fantastic sentences to describe familiar settings whilst ensuring that our spelling, grammar and punctuation is correct. We are setting ourselves the challenge of using interesting and exciting vocabulary. Reading is incredibly important as we try to encourage the children to read a range of different genres. Handwriting will also be important, especially as we begin to build up the children's writing stamina.

Science In science we will be working hard to develop our own questions and devising our own investigations. This will be done through our different topics;

Keeping Healthy, Light and Shadows, Forces and Magnets, Rocks and Fossils,

Helping Plants Grow, Roots and Shoots.

RE We will study a range of topics within RE and share in the celebration of Mass together. Children will also begin their preparation for the sacrament of Reconciliation, which will take place in Year 3.

Topic In year 3 we love our topic work, often linking our art and design & technology work to the topic that we are studying. We will explore;

The Vikings, The local area - focussing on canals and ceramics, Fairtrade
